3+ years experience in web applications development using PHP framework (such as CodeIgniter and Laravel) and JQuery. Have sufficient experience regarding system design, database design, ERD/UML, and communication skills. Looking for job opportunities to apply the skills I have, even better if there are new skills to learn and apply.

Work Experience

PHP Developer

CV. Internal Media, Kalibata, Jakarta Selatan | March 2019 - November 2020

- Build and developing application using CodeIgniter Framework and MySQL database.
- Creating web pages for user interfaces using HTML, Bootstrap, and JQuery.
- Learn to build application programming interfaces (API) and develop them using CodeIgniter Framework.
- Participate in building user experiences, aiming to make it easier for users to operate the application.
- Participate in building or modifying database design.
- Ensured that all work complied with client established standards and guidelines.
- Learn and migrate Content Management System (CMS) from CodeIgniter using Laravel Framework.
