3+ years experience in web applications development using PHP framework (such as CodeIgniter and Laravel) and JQuery. Have sufficient experience regarding system design, database design, ERD/UML, and communication skills. Looking for job opportunities to apply the skills I have, even better if there are new skills to learn and apply.

Work Experience

PHP Developer (Freelancer)
March 2019 - Present

- Build efficient, testable and reusable PHP function.
- Implement code based on project specifications.
- Interact with team about the requirement, analyze requirement and then develop functionality accordingly.
- Integrated third-party API such as RajaOngkir, Midtrans and Digiflazz to complete the task.
- Creating web pages for user interfaces using HTML, Bootstrap, and JQuery.
- Improvement of system architecture by refactoring old legacy code to the latest technology.
- Ensured that all work complied established standards and guidelines.
